The use of opioids in pregnancy has drastically increased in recent years. This affects two vulnerable populations: pregnant women and their babies.

Since 2008, pregnancy-associated deaths from opioid overdoses have INCREASED 1000%

In Illinois between 2016-17, 40% of pregnancy-related deaths were related to mental health conditions including substance use disorder.

Source: IDPH MMRC Report (April 2021)

In Illinois there was a 64% increase in the rate of NOWS between 2011 and 2017

Infants with NOWS born in Illinois have longer hospital stays and higher hospital charges than infants without NOWS.

In 2017:
- The median LENGTH OF HOSPITAL STAY AFTER BIRTH was 11 days longer
- Charges for the BIRTH HOSPITALIZATION were about $40,000 more
- Total charges for HOSPITAL CARE were nearly $25 million higher than what would have been expected if they had been born without NOWS

Mothers and Newborns affected by Opioids

MAKING CHANGE HAPPEN: MNO Neonatal Initiative

In Illinois, 88 birthing hospitals are participating in the ILPQC Mothers and Newborns affected by Opioids (MNO) Neonatal Initiative, working to implement system-wide protocols and culture changes to improve outcomes for opioid-exposed newborns (OENs).

MNO NEONATAL AIMS

- Decrease proportion of OENs REQUIRING PHARMACOLOGIC TREATMENT TO BELOW 20%
- Increase proportion of eligible OENs RECEIVING MATERNAL BREASTMILK TO ABOVE 70%
- Increase proportion of OENs DISCHARGED WITH A SAFE DISCHARGE PLAN TO ABOVE 95%

SEEING PROGRESS

- Percent of OENs Receiving Pharmacologic Treatment
- Mean Length of Stay for all OENs

ILPQC meets monthly with KEY STAKEHOLDERS:

- 31 physicians and nurses representing 19 hospitals on Neonatal Advisory Workgroup
- 3 patient/family advisors
- Illinois Department of Public Health and the Regionalized Perinatal System
- Illinois Department of Human Services
- Illinois Department of Healthcare and Family Services
- Centers for Disease Control and Prevention

ILPQC is a multi-disciplinary, multi-stakeholder collaborative with 106 participating Illinois hospitals. ILPQC supports hospitals’ implementation of evidence-based practices using:

- QUALITY IMPROVEMENT SCIENCE
- COLLABORATIVE LEARNING
- RAPID RESPONSE DATA
