Mom-Baby Postpartum Testing Protocol

Patient becomes symptomatic* after delivery and transfer to Postpartum Unit

Consult OB-C attending to coordinate testing

Call the lab to emphasize urgency

Implement COVID-19 PPE practices

Separate infant per COVID-19 protocols until test resulted

Support person can remain at bedside—should be masked at all times and remain in room

Is the patient COVID-19 positive?

Yes → Transfer patient to OB-C & separate from support person

No → Implement droplet PPE → Reunite mother and baby → Support person remains masked → Patient remains on Postpartum Unit

Symptomatic includes fever > 100.0∘F or cough or sore throat or GI symptoms or SOB.
