

2. Hospital & QI Team Overview

Dr. O. Itani Physician Lead/Mary Grimm RN Mgr
Mary Ward-Mayster SCU Supervisor
Cheryl Chemers SCU Educator
Sonia Ramirez SCU Carol Banks M/B (Staff RNs)

3. MNO-Neo Data

Breastfeeding:

Very Low volume of MNO Couplets
Neo/Peds supportive and encouraged
breastfeeding-discussed at prenatal consult.
2-BF w/supplementation 2-exclusive BF
1-declined BF

Pharm/Non-Pharm Treatments

100% of infant received pharm treatment
with NAS-
100% also on ESC protocol prior to pharm tx
ILPQC Infant Bedside Sheet utilized

Coordinated Discharge Plans

Total MNO infants-5
Safe, Coordinated D/C plan-4
DCFS-1

4. MNO-Neo Progress

NAS Assessment Tools

Used the ESC and Finnegan. Education and written handouts for mother to educate on NAS assessments, frequency and how she can respond to her infant's

MNO-Neo Folders

All FBC areas have MNO folders. Folder is reviewed with mother at all stages of treatment plan. One side is maternal info, other neonatal.

Education Campaign

Staff education 1. Stigma of OUD,
2. ESC, 3. MAT, 4. NAS Assessment, 5.
Keeping couplets together. Education ongoing with recent updates in March 2020

Review of all NAS cases

We have "nesting rooms" in the SCU so even after d/c mother can remain with infant-this is a definite benefit for success. All couplets plan updated and discussed at shift huddles.

Only one mother in treatment program prior to delivery
Identified lack of resources in the community

5. Coordinated Discharge

Current discharge and materials.

Resources utilized: Early Intervention, WIC, Pediatrician follow up, APORS, DCFS, HHS. Appointments made prior to discharge when appropriate.
MNO Discharge Planning Checklist and MNO Collaborative Discharge Plan is utilized.
