Recovery
Program/
Services

Narcan

4. MNO-OB Progress

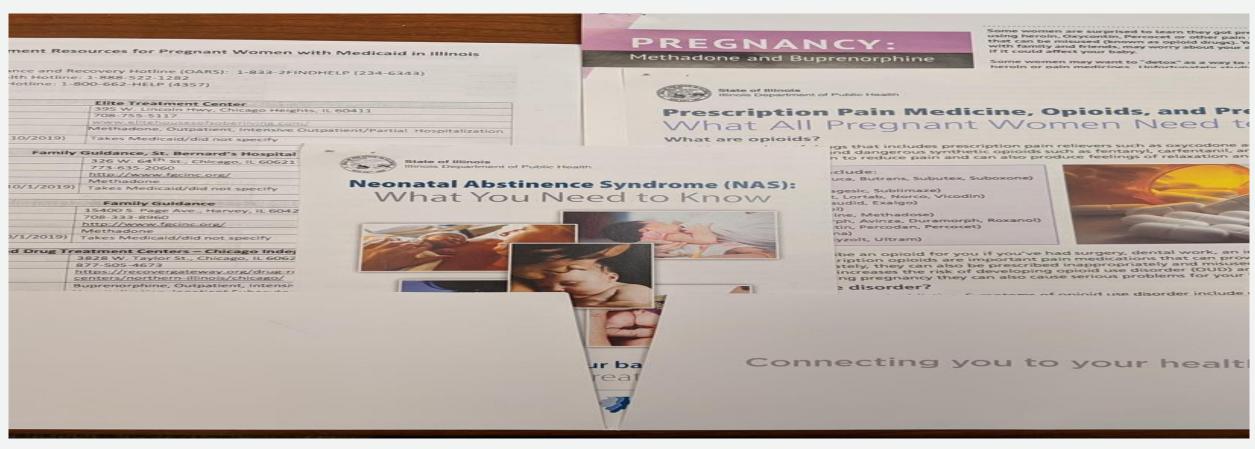

Screening Tools

5 P's screening tool adopted system wide.

OB providers were informed in formal OB meetings of the MNO initiative and provided with literature for patients and providers.

We have engaged the largest OB provider group by collaborating with their MD's, nurses and social worker. They utilize the 5-P screening tool as well as provide the materials used in our hospital MNO-OB packet. Going forward we plan on-site visits to the remaining private OB groups in order to facilitate their participation. We have over 25 private groups, so this is a work in progress as time and resources allow.

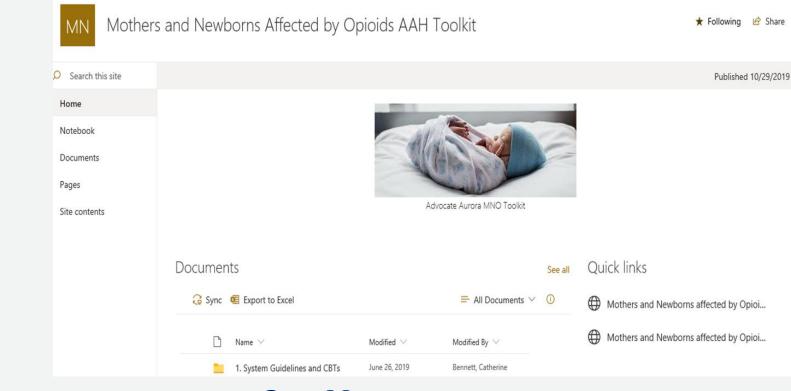

MNO-OB Folders

- NAS: What you need to know flyer
- Prescription pain medicine, opioids and pregnancy: What all pregnant women need to know flyer
- Pregnancy: Methadone and Buprenorphine-flyer
- Community treatment resources for pregnant women-handout developed by ACMC
- Folders, 5P tool, and MNO checklist are initiated in triage and/or L&D

Education Campaign

- Initially education was brought to OB department meetings and nursing unit meetings
- Included in yearly skills days-role playing
- CBT's

- Included in RN orientation
- Included in resident training
- System wide Sharepoint site is available with all forms and resources accessible

Draft 30/60/90-day plan PVB

30 day

- Meet and greet with roles defined
 Review current practices which pror
- •Review current practices which promote vaginal birth
- •Explore system level plans for implementation and training

AUGUST | SEPTEMBER | OCTOBER | NOVEMBE | DECEMBER

•Create a survey for L&D RN's to determine understanding of PVB and current interventions used to promote vaginal birth

60 Day

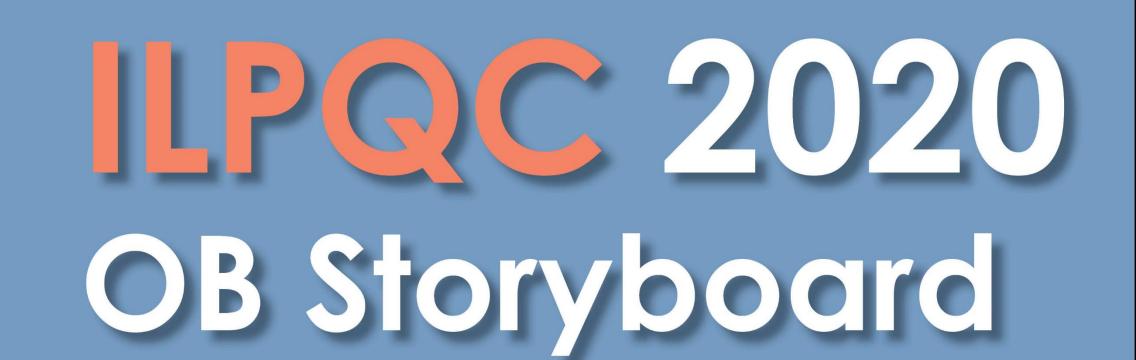

- •Work with MD champion, CNM and Ob chairman to develop plans for provider side of initiative
- •Review SMFM and ACOG guidelines and current medical literature to benchmark needs in the department
- •Distribute RN survey
- •Reach out to nurse educators within the system to collaborate on sharing of training and educational resources
- •Explore the use of simulation scenarios for education purposes

Monthly Review of all OUD Cases

- MNO patients reviewed at staff huddles every shift to assure protocol adherence and checklist completion
- Part of QI review for the Women and Infant's division
- Plan to continue tracking compliance with identification (5-P's) and audit of maternal and newborn charts for treatment plans and discharge follow up

Advocate Christ Medical Center

<u>Use this space for overflow and additional information your team would like to share.</u>

MNO Workflow and process

Wins

- Successful collaboration with the NICU for comprehensive care of the mother/baby dyad
- Priority referral for OB patients to inhouse grant funded OUD program which provides
 SBIRT
 - OReferral to treatment and peer counselor follow up in house and post discharge
 - Narcan counselling
- ESC practiced on postpartum unit
