

ILPQC 2020 Storyboard Guide

One of the most important parts of the ILPQC Face to Face Meeting is the opportunity for teams to share strategies for success. This year we are excited for teams to submit their ILPQC Team Storyboards through our virtual format. We ask every ILPQC team to complete the virtual storyboard template to share their progress on ILPQC initiatives. Please feel free to personalize this poster in ways that best highlight your teams accomplishments!

It is easy to plug in some photos, data and bullet points and submit!

OB-Storyboard Instructions

1. Insert your hospital logo and name at the top of the slide.

2. Hospital & QI Team Overview

List your QI team and roles. Also insert a picture of your QI team and hospital.

3. MNO-OB Data

Insert structure measures graphs from REDCap for one or more of the following:

- Screening Tool
- MAT
- Recovery Program/Services
- Narcan

4. MNO-OB Progress

Fill in MNO-OB progress/plans for sustainability towards four key strategies for success. The four key strategies are:

- Screening tools
- MNO-OB folders
- Education campaign
- Monthly review of all OUD cases

5. IPLARC/IPAC or MNO Overflow

Use this area to insert IPLARC & IPAC success/plans for sustainability, as additional space to share your MNO-OB progress or to display your MNO-OB protocol/algorithm.

6. Promoting Vaginal Birth (PVB)

Tell us about your PVB QI Team and about your 30/60/90 day plan if team has a draft ready to share.

7. Save your Storyboard as a pdf and rename it using your full hospital name and if it is an OB or Neonatal Storyboard (ex. *Smith Hospital OB*).

8. Please email the completed storyboard by [May 14](mailto:info@ilpqc.org) to info@ilpqc.org.

**Helpful tip: Use a 66 point font when inputting data into the storyboard for ease of viewing.*

Neonatal-Storyboard Instructions

1. Insert your hospital logo and name at the top of the slide.

2. Hospital & QI Team Overview

List your QI team and roles. Also insert a picture of your QI team and hospital.

3. MNO-Neonatal Data

Insert structure measures and graphs from REDCap for one or more of the following:

- Breastfeeding
- Pharmacological/Non-Pharmacological Treatments
- Coordinated Discharge Plans

4. MNO-Neonatal Progress

Fill in MNO-Neonatal progress towards four key strategies for success. The four key strategies are:

- NAS assessment tools
- MNO-Neonatal folders
- Education campaign
- Monthly review of all NAS cases

5. Coordinated Discharge

Share your teams' current discharge process and materials.

6. Babies Antibiotic Stewardship Improvement Collaborative (BASIC)

Share your anticipated team members and role on the team, current tools or materials (ex. National Sepsis calculator) your hospital has already implemented, and potential barriers and strategies to overcome them.

Thank you for your participation!

ILPQC 2020 OB Storyboard

2. Hospital & QI Team Overview

Fill in QI team & roles here

List here your team members names and the roles on your team. Include a photo if you have one.

If participating in IPAC or IPLARC, list your QI team and their roles here.

4. MNO-OB Progress

Screening Tools

Share your selected screening tools and your process to engage your outpatient providers/sites.

MNO-OB Folders

Share a picture of your folder and list items you have included. Describe the system(s) you have put into place to ensure the folders are used and continue to be available in both the inpatient and outpatient setting.

Education Campaign

Describe and share pictures of the education campaign strategies have you implemented for both providers and nurses.

Monthly Review of all OUD Cases

Describe your team's process to review all OUD cases and provide feedback to the clinical care team.

5. IPLARC/IPAC or MNO Overflow

Display IPLARC/IPAC progress and sustainability planning

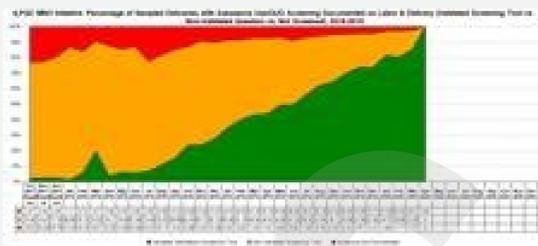

Share your team's sustainability plans for IPAC and/or IPLARC.

OR MNO Overflow-display your MNO-OB protocol/algorithm.

Use this space here for any over flow on MNO-OB progress.

3. MNO-OB Data

Screening

MAT

Recovery
Treatment Services

Narcan

6. PVB

Fill in QI team & roles here

List your team members names and their roles on your team.

Share 30/60/90 day plan if draft if available.

ILPQC 2020 Neo Storyboard

2. Hospital & QI Team Overview

Fill in QI team & roles here

List your team members names and the roles on your team. Include a photo if you have one.

4. MNO-Neonatal Progress

NAS Assessment Tools

What assessment tools are you currently using? Have you implemented a new assessment tool such as ESC? If so, describe how you successfully transitioned? How do you engage mothers/families in non-pharmacologic care?

MNO-Neonatal Folders

Share a picture of your folder and list items you have included. Describe the system(s) you have put into place to ensure the folders are used and continue to be available.

Education Campaign

Describe and share pictures of the education campaign strategies have you implemented for both providers and nurses.

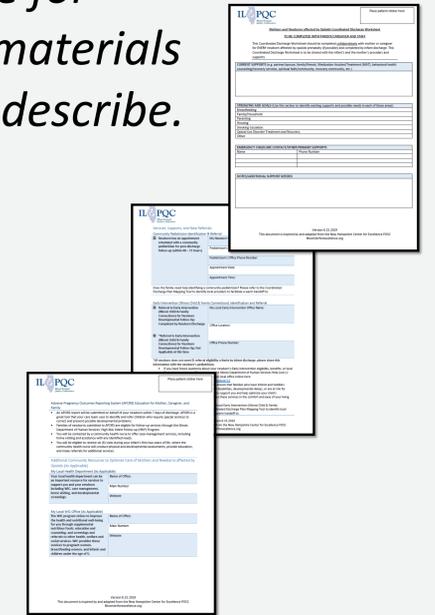

Review of all OEN Cases

Describe your team's process to review all OEN cases and provide feedback to the clinical care team.

5. Coordinated Discharge

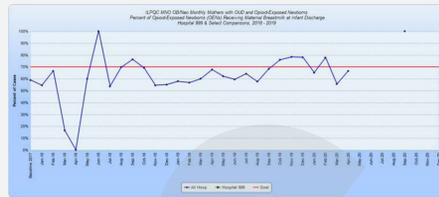

Describe your team's process for completing a coordinated discharge for every OEN. Share any materials your team is using and describe.

Who does what in the discharge process?

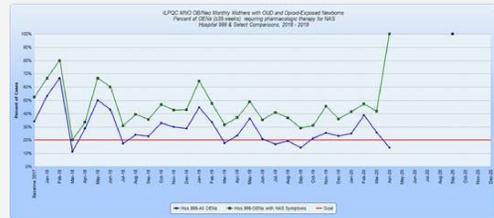

3. MNO-Neonatal Data

Breastfeeding

Pharm/Non-Pharm Treatments

Coordinated Discharge Plans

6. BASIC

Fill in QI team & roles here

Share your anticipated team members and their roles, current tools or materials your hospital has already implemented, and strategies to overcome potential barriers.
