Obstetrics Initiative

The Obstetrics Initiative (OBI) is a state-wide data-driven quality improvement project comprised of 75 Michigan maternity hospitals. We lead statewide collaboration to create optimal maternity care experiences for all Michigan families.

We were launched in 2018 and initiated projects in 2019. OBI is a Collaborative Quality Initiative (CQI) funded by Blue Cross Blue Shield of Michigan/Blue Care Network.

Our first initiative is supporting physiologic vaginal birth and safely lowering the cesarean delivery rate among low-risk (for cesarean delivery) patients.

27.4 %

OBI Collaborative BASELINE cesarean birth rate (January – November 2020)

24.7 %

AIM: 10% relative reduction in OBI collaborative wide NTSV Cesarean Birth rate from 27.4% to 24.7% by December 2022.

**How we
will
measure:**

Calculated collaborative-wide cesarean birth rates using NTSV cases submitted to the OBI Workstation.

Control charts to monitor ongoing changes and a mean rate for Jan-December 2022 cases will be calculated in May 2023 when 2022 cases are final.

2022 Obstetrics Initiative (OBI) Collaborative Quality Initiative Performance Index Scorecard			
Measurement Period: 01/01/2022 - 12/31/2022			
Measure #	Weight	Measure Description	Points
1	5%	OBI Hospital Survey	5
		Complete the 2022 Undisturbed Labor and Birth (ULaB) Survey	5
2	10%	Attendance at the OBI Collaborative SemiAnnual Meetings*	10
		At least one Multistakeholder Team Member attends both SemiAnnual Collaborative Meetings (April 15, 2022 & November 4, 2022)	5
		Clinical Data Abstractor (CDA) or designee attends both SemiAnnual Collaborative Meetings (April 15, 2022 & November 4, 2022)	5
3	5%	Maternity Unit Culture	5
		>50% labor and delivery (L&D) staff completed the labor culture survey by June 1, 2022	5
		>30% L&D staff completed the labor culture survey by June 1, 2022	2
4	10%	Education	10
		Peer-to-Peer Engagement: Video Workgroups	7
		Attend 6 out of 6 monthly video peer-to-peer workgroups	7
		Webinars*	3
		Disseminate each of the 3 OBI Webinars to unit staff	3
5	10%	Nulliparous, Term, Singleton, Vertex (NTSV) Case Selection Audit Accuracy	10
		>97% Case Selection Accuracy	10
		92 - 97% Case Selection Accuracy	6
		< 92% Case Selection Accuracy	2
		No Audit Participation	0
6	20%	Dystocia Compliance Measure	20
		60% compliance or above	20
		40-59.9% compliance	10
		0-39.9% compliance	0
7	40%	Assessment of Fetal Well-Being and Patient Engagement QI Implementation	40
		Choose one of the following projects:	
		1. Implementation of RPC IA Bundle	
		2. Management of Category II Fetal Heart Rate Tracings	
		3. Continue or Initiate TeamBirth	
		Scores 95 - 100 points on selected QII	40
		Scores 81 - 94 points on selected QII	35
		Scores 70 - 80 points on selected QII	30
Scores 60-69 points on selected QII	25		
Scores 1 - 59 on selected QII	15		
No implementation	0		
100%		TOTAL	100
		*CME and CEU available	
		Indicates Participation Measures	
		Indicates Performance Measures	

Annually we develop the Pay for Participation/Performance Score Card

Hospitals receive compensation based on their score on the card

The initial emphasis was on participation and has transitioned to performance measures since 2021

MI AIM 2021 Designation Criteria CALENDAR YEAR 2021

Measure Name	Measure Description	Total Points
Participation in MI AIM completed via attestation form on www.miaim.us	Commitment document signed and returned by one member of hospital administration, one member of data or quality, and one member of OB team. Due by September 15, 2021 *Required	5
	Combination of meeting and webinar attendance	
	1. At least one member of the hospital team attends the <i>June 28-29, 2021</i> Mother Infant Health Summit.	5 points (5 bonus points for all three)
	2. At least one member of the hospital team attends two Regional Perinatal Quality Collaborative meetings and participate actively.	
	3. At least one member of the hospital team attends at least 4 educational webinars	
	*Hospital receives 5 points for attendance at TWO of the above or 10 points (5 bonus points) for attending all THREE events. *attestation survey	
	Provider Education	
	Completion of Implicit Bias Training for health care professionals (including medical staff and trainees): 50% of OB health care professionals 5 points or; 75% of OB health care professionals 10 points or; 100% of OB health care professionals 15 points (5 bonus points) *attestation survey	5-10 (5 bonus points for 100% of OB professionals)
	Sign up for the MI AIM Technical assistance list serve and have at least one person of the hospital team participated in a Maternal Health Safety Session (if available). *attestation survey	5
Total Points for Participation in MI AIM	Combination of meeting and webinar attendance (max 10 pts, 5 bonus point option) and Provider Education (max 15 pts; 5 bonus point option)	25 pts (+10 bonus points)

Measure Name	Measure Description	Total Points
2021 Data Reporting (20 pts)	Complete structure survey by September 15, 2021 in KeyMetrics. (The MHA will send a notification for survey to hospitals in July, when survey opens)	5
	Report monthly process measures (Jan '21 – Dec '21) Submit monthly data no later than two months after the end of each month (data deadlines within KeyMetrics). [One point for each month an additional +3 points for 12 months of on time data.] *attestation survey	15
Implementation (55 pts)	Hemorrhage (20 pts)	
	Average of ≥80% of deliveries have a PPH Risk Assessment <i>completed once on admission into L&D and on admission to Postpartum</i> ; 20 chart abstractions per month [10 vaginal deliveries and 10 c-section deliveries or query all deliveries]	10
	Average of ≥80% of all deliveries have QBL; 20 chart abstractions per month [10 vaginal deliveries and 10 c-section deliveries or query all deliveries]	10
	Severe HTN (20 pts)	
	Average of >80% of cases time to treat severe range BP's < 60 minutes (include all cases that equal 160/110); 20 chart abstractions per month [10 vaginal deliveries and 10 c-section deliveries or query all deliveries]	20
	OR	
	Show improvement in time to treat severe range BP's < 60 minute from calendar year 2020 (include all cases that equal 160/110); 20 chart abstractions per month [10 vaginal deliveries and 10 c-section deliveries or query all deliveries]	20
	Sepsis	
	Attestation that hospital has implemented a policy for maternal sepsis for screening, protocol for diagnosis, and prompt treatment. *attestation survey	10
	Submit Sepsis Bundle metrics into KeyMetrics through 2021	(5 bonus points)
	OBI (5 pts)	
	Average of > 60% of NTSV primary cesareans performed for dystocia meet ACOG/SMFM (this information is received by individual hospital from OBI and then hospital submits to MI AIM via attestation survey) *attestation survey	5
Total Points Data Reporting and Implementation	Combination of data reporting (20 points), Hemorrhage Bundle Implementation (20 points), Severe Hypertension Bundle Implementation (20 points), Sepsis Bundle Initiation (10 points), Sepsis bundle data submission (5 bonus points), and OBI engagement (5 points).	75 (+5 bonus points)
Total		100 (+15 bonus points)

SAFE REDUCTION OF PRIMARY CESAREAN BIRTHS:
SUPPORTING INTENDED VAGINAL BIRTHS

O I  Target High Impact Areas for Change

Obstetrics Initiative
Safe Births. Healthy Moms & Babies.

OBI supports vaginal births and *safely* reducing cesarean deliveries for “low-risk” pregnancies in Michigan hospitals.

Neonatal Abstinence Syndrome Protocol

- **Non-Pharmacologic Bundle:**
 - Swaddling, Clothed Cuddling, Quiet Room, **Feeding**
- **Pharmacologic Therapy Bundle:**
 - Morphine or Methadone
 - Escalate, Stabilize, Wean

After 9 months, length of *pharmacologic* treatment decreased by 9% from 13.4 to 12 days, and the LOS decreased by 9% from 18.3 to 17 days.

Further reductions in LOS following test of *non-pharmacologic therapy (optimal feeding)* from 17 to 16.3 days

Total = 2 days reduction in LOS

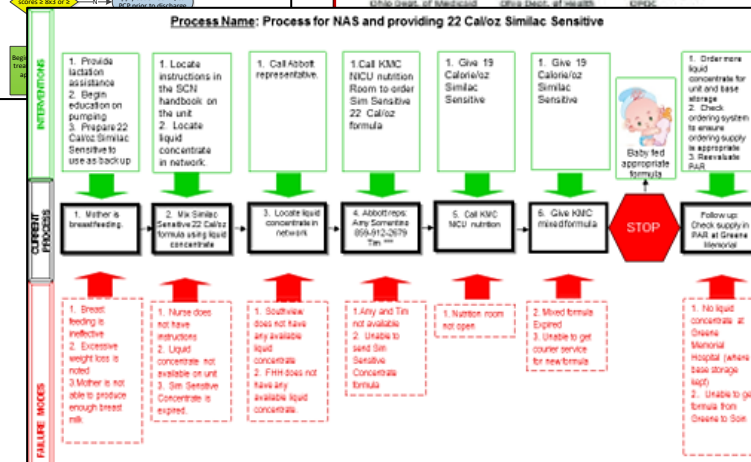

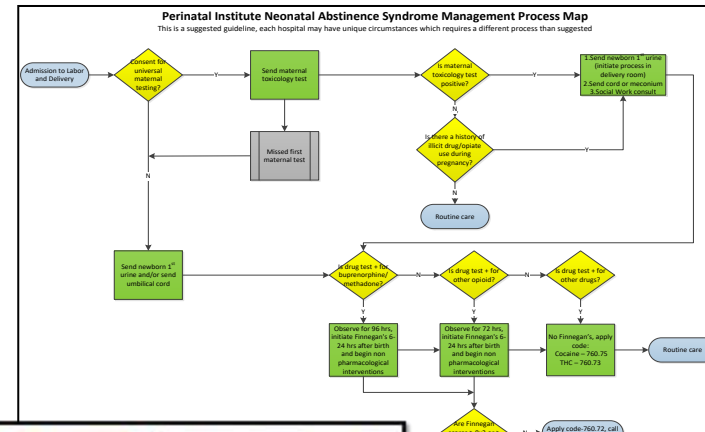

In 2017, avoidance of 846 hospital days; estimated savings of almost \$1m/year (and better mother/infant connection)

Current OPQC Projects

Project title	Description	Partners
Maternal Safety	Working with state partners to improve safety of women during pregnancy and early postpartum (using AIM bundles)	Ohio Department of Health Ohio Government Resource Center
Addressing Pregnancy Risk	Working with Ohio Medicaid to ensure that risk factors affecting maternal safety during pregnancy (and infant health) are addressed	Ohio Department of Medicaid
Maternal/Infant Dyad	Working with Ohio Medicaid to identify optimal care for women with Opioid Use Disorder and their Infants during the first year postpartum	Ohio Department of Medicaid
Compassionate Care	Developing a plan to address compassionate care of women of color during pregnancy and birth	Ohio Department of Health
MaternalHealthCARE	Piloting strategies to improve maternal health and advance racial equity	March of Dimes
Saving pregnant and postpartum lives	Significantly reduce the % of pregnancy-associated deaths due to opioid overdose; supporting maternity care practices and birth hospitals in facilitating provision of Narcan to pregnant and postpartum women with OUD	Centers for Disease Control and Prevention

Impact of Covid

- OPQC hosted 7 COVID specific webinars "COVID-19: What Maternity and Neonatal Care Providers Are Learning" from March – June 2020
- The impact of the COVID pandemic has been huge on our hospitals
 - Staffing reallocation, resignation, prn/travel staff, FMLAs...
 - Some QI work needed to be paused or halted

Impact of Covid

- How do we now work with teams to “meet them where they’re at”?
- The context of covid challenges highlighted the strength of our teams as well as our own strengths within OPQC

Strategic Plan for the VNPC

[Back to Navigation Page](#)

Strategic Priority #1: Health Equity

Ensure all pregnant and parenting people and families receive quality care reflective of their needs and desires before, during, and after pregnancy.

Strategic Priority #2: Communities

Strengthen relationships and build trust to engage diverse communities, that reflect the pregnant/parenting populations, in the work of the Collaborative.

Strategic Priority #3: Data

Increase access, understanding, and utilization of perinatal and infant care data.

Strategic Priority #4: Communication

Share a vision of success that mobilizes our community to action and change.

VNPC QI Projects

VNPC Prenatal and Postpartum Care Workplan

	Early Prenatal (1st & 2nd Trimester)	Late Prenatal (3rd Trimester and Admission)	Delivery—All pregnancy outcomes (Admission to Discharge)	Early Postpartum (Discharge to 3 weeks postpartum)	Late Postpartum (4 weeks to 6 months postpartum)	Transition (6-12 months postpartum)
	Phase 1	Phase 2	Phase 3	Phase 4	Phase 5	Phase 6 (Transition)
Goal	<ul style="list-style-type: none">*Screening*Risk assessment*Awareness of changes to body and new baby*Discuss culturally relevant aspects of patient care (e.g. religious practices).	<ul style="list-style-type: none">*Coordination of care,*Shared decision making*Planning for changes as a dyad	<ul style="list-style-type: none">*Preventative care*Education*Individualized identification of risk factors—appropriate levels of follow-up care	<ul style="list-style-type: none">*Policy & system changes*Dyad lenses/focused care*Connection to community resources	<ul style="list-style-type: none">*Optimization of patient referrals to specialty providers*Facilitate tele-health visits as a preferred method*Utilize technology to improve screening, tracking of long-term health and education	<ul style="list-style-type: none">*Decision to be made with patient and provider*Establish a medical home for mom and baby dyad*Provide access to tele-health visits as needed

Lessons Learned for Developing QI Projects

[Back to Navigation Page](#)

- Apply the **Institute for Healthcare Improvement (IHI)** principals
 - Attend **IHI Breakthrough Series (BTS)** if possible
- Take **6-12 months** to develop the QI project
- Establish a **Subject Matter Expert(SME)** Team of 10-15 people
- Hold at least two **4-6 hour** planning meetings
- Meet **monthly with SME team** to work through challenges

Lessons Learned for Implementing QI Projects

[Back to Navigation Page](#)

- Pilot the project in a **SMALL** select number of hospitals
- Develop a **6 week intensive “boot camp”** for hospitals selected to implement project
 - How to create storyboards
 - What are PDSA cycles
 - How to develop a workplan
 - How to use data from the Maternal Health Dashboard to inform AIMS
 - How to enter data into Life QI
 - How to collect/find baseline data
 - How to establish a team, who should be on the team
 - How to engage Senior Leadership and gain their buy-in
 - What topics are needed for Technical Assistance
 - Establish 1:1 check-ins with teams
