A Black woman is 3 to 4 times more likely to die of pregnancy-related complications than a white woman. Research shows that inequities in outcomes are primarily due to differences in how women are treated within the health care setting based on race (racism).

The SPEAK UP ChampionTM Implicit and Explicit Racial Bias education is a total of 8 hours over two days (Jan. 19th & 26th) of live virtual interactive learning that outlines quality improvement strategies to support individuals and groups with dismantling racism, providing quality equitable care, and reducing health disparities.

Target Audience

Healthcare professionals who support and care for patients before, during and after pregnancy or professionals that care for newborns.

Objectives

1. Background Knowledge

Describe factors that contribute to perinatal disparities based on a social justice framework.

2. Improvement Science

Outline quality improvement strategies and tactics for eliminating implicit and explicit bias when caring for women before, during, and after pregnancy.

3. Action Plan

Develop a quality improvement action plan for ensuring equity in perinatal outcomes.

Quotes from Previous Participants

“Eye opening!”

“I will continue to check myself and speak up when I see bias. Excellent training! Thank you!”

“Great training. Very helpful and empowering!”
