A Black woman is 3 to 4 times more likely to die of pregnancy-related complications than a white woman. Research shows that inequities in outcomes are primarily due to differences in how women are treated within the health care setting based on race (racism).

The SPEAK UP Champion™ Implicit and Explicit Racial Bias education is a total of 8 hours over two days (June 15th & 16th) of live virtual interactive learning that outlines quality improvement strategies to support individuals and groups with dismantling racism, providing quality equitable care, and reducing health disparities.

Target Audience

Healthcare professionals who support and care for patients before, during and after pregnancy or professionals that care for newborns.

Learning Outcomes

1. Describe factors that contribute to perinatal disparities based on a racial equity framework.
2. Outline quality improvement strategies and tactics for eliminating implicit and explicit bias in perinatal care.
3. Develop a quality improvement action plan for ensuring equity in perinatal outcomes.

Content

1. **Background Knowledge**
Describe factors that contribute to perinatal disparities based on a social justice framework.
2. **Improvement Science**
Outline quality improvement strategies and tactics for eliminating implicit and explicit bias when caring for women before, during, and after pregnancy.
3. **Action Plan**
Develop a quality improvement action plan for ensuring equity in perinatal outcomes.

Quotes from Previous Participants

“Eye opening!”

“I will continue to check myself and speak up when I see bias. Excellent training! Thank you!”

“Great training. Very helpful and empowering!”
