Division of Maternal Fetal Medicine
University of Pennsylvania Health System
Director of Obstetrical Services at the Hospital of the
University of Pennsylvania*

Sarosh Rana, MD, MPH, FACOG

*Professor of Obstetrics and Gynecology
Section Chief, Maternal-Fetal Medicine
The University of Chicago
Department of Obstetrics and Gynecology*

Overview

Hypertensive disorders of pregnancy are a leading cause of maternal morbidity and mortality, and the risk of complications continues after delivery. Comprehensive programs for management of hypertension in pregnancy and postpartum, including home blood pressure monitoring, have demonstrated impressive outcomes in improving maternal health.

This webinar will include presentations on two model programs: Heart Safe Motherhood, at the University of Pennsylvania Hospital; and STAMPP- HTN (Systematic Treatment And Management of PostPartum Hypertension) at the University of Chicago Hospital.

Through this webinar, participants will learn:

- The prevalence of and complications related to, maternal hypertension
- The benefits of controlling maternal hypertension
- The implementation approaches of two successful intervention models

Audience

Health and social services providers, public health professionals, program and policy staff, community and faith-based organizations along with stakeholders addressing women and girls' health issues.

Register for additional webinars.
