

Safe Deliveries Roadmap

The Safe Deliveries Roadmap[©] Learning Collaborative

Through the Safe Deliveries Roadmap initiative, the Washington State Hospital Association and our partners aim to improve maternal and infant outcomes by establishing and promoting best practices for care. Current work includes co-leading the Washington State Alliance for Innovation on Maternal Health (AIM) program to reduce Severe Maternal Morbidity and Mortality.

Obstetrical practices, maternal and infant health leaders are invited to join us in this important endeavor through the adoption of these best practices to ensure safe deliveries and healthy babies.
