Target Audience

Obstetricians, Neonatologists, Family Medicine Physicians, Residents, Nurse Midwives, Advanced Practice Nurses, RNs, Social Workers, Addiction Professionals, Hospital Administrators, and Maternal/Child staff with an interest in increasing their knowledge in Perinatal Medicine.

Learning Objectives

1. Understand the prevalence of each type of substance use disorder in pregnancy.
2. Become knowledgeable about how each type of drug of abuse impacts the mother, the pregnancy, and the newborn.
3. Explore ways to address and treat addiction and addictive behavior with their patients.
4. Understand the role of a Level III social worker in working with a drug exposed newborn and become knowledgeable about supportive interventions and available resources.
5. Identify psycho-social barriers during the treatment process.
6. Identify the signs and symptoms of withdrawal in the newborn infant and scoring with the NAS assessment tool.
7. Develop pharmacologic and non-pharmacologic management strategies for the infant withdrawing from prenatal exposure to opioids.
