

Aims and Measures

Overall Initiative Aim

Within 9 months of initiative start, $\geq 75\%$ of participating hospitals will be providing immediate postpartum LARCs.

Structure Measures

IT/EMR systems that allow for documentation of IPLARC placement for tracking, and documentation

Coding / billing strategies in place for reimbursement for IPLARC

IPLARC devices stocked in the inpatient pharmacy

IPLARC protocols in place for labor and delivery and postpartum units

Communicated launch of IPLARC availability during delivery admission with affiliated prenatal care site and provided sites with provider/staff and patient education materials for contraceptive options counseling including IPLARC

Implemented standardized education materials and counseling protocols* for patients during delivery admission regarding contraceptive options including IPLARC

Process Measure

Educated all participating providers/nurses on benefits of IPLARC, protocols, counseling & IPLARC placement

Outcome Measure, among participating hospitals

By increasing access to IPLARC, increase in utilization of IPLARC

*Protocols include the obstetric care process flow of counseling patients, accessing LARC, inserting LARC, and billing for LARC
