

# MNO Key Driver Diagram for Neonates

## Aims

- Decrease pharmacologic treatment in substance exposed neonates
- Increase safe and optimized discharge plans in substance exposed neonates
- Increase breastfeeding rates in substance exposed neonates at discharge

## Primary Drivers

Identification and Assessment of SENs

Treatment

Safe Discharge

## Secondary Drivers

Strengthen Family/Care Team Relationships

Improve pre-delivery planning

Standardize identification, assessment, and monitoring of SENs

Provide Family Education

Improve infant nutrition and breastfeeding

Optimize non-pharmacologic care

Standardize pharmacologic treatment

Coordinate safe discharge

## Change Ideas

Non-judgmental support

Prenatal pediatric consultation

Social work consultation

Toxicology screening

Assessment tools

Feeding guidelines

Non-pharmacologic care guidelines

Pharmacologic treatment guidelines

Safe discharge guidelines
