"Go Live" date is May 2020 for Wave 2 teams!
Practice Changes for IPLARC Success – Pre-implementation

1. Assure early **multidisciplinary** support by educating and identifying **key champions in all pertinent departments** for your IPLARC QI team.

2. Establish **scheduled meetings for your team** at least monthly, assuring that all necessary departments are represented, **develop 30/60/90 day plan**, establish timeline to accomplish key steps.

3. Establish and test **billing codes** and processes to assure adequate and timely reimbursement (see toolkit).

4. **Expand pharmacy/inpatient inventory capacity** and device distribution to assure timely placement on labor and delivery and postpartum units.

5. Educate clinicians, nurses, pharmacy, and lactation consultants about benefits and clinical recommendations related to IPLARCs (see toolkit for e-modules, slide decks, materials).

6. Assure that all **appropriate IT/EMR systems are modified** to document acquisition, stocking, ordering, placement, counseling, consent, billing and reimbursement for IPLARCs (dot phrases to document counseling and placement, consent forms, order set, billing framework see toolkit examples).

7. **Modify L&D, OB OR, postpartum, and clinic work flows** (protocols/process flow/checklists) to include counseling, consent, and placement of IPLARC (see toolkit for example).
Practice Changes for IPLARC Success – Implementation

8. **Establish consent processes for IPLARC** that allows for transfer of consent from prenatal clinic as well as obtaining inpatient consent (see toolkit for examples).

9. **Develop educational materials and shared decision making counseling practices to educate patients about the availability of IPLARC as a contraception option** (outpatient prenatal care locations, L&D, postpartum) (see toolkit for examples).

10. **Educate clinicians, and nurses on informed consent and shared decision making related to IPLARC as well as IPLARC placement and documentation** (see toolkit for ILPQC/ACOG training, e-modules, slide decks, education materials).

11. **Standardize system / protocol / process flow** to assure all patients receive comprehensive contraception choice counseling including IPLARC in affiliated prenatal care sites and during delivery admission, with documentation of counseling.

12. **Communicate launch date of hospital’s IPLARC capability** to all providers, nurses and affiliated prenatal care sites: communicate protocols, documentation and billing strategies.

13. **Track and review IPLARC data, collected monthly through ILPQC REDcap data system with real-time data reports**, share data with providers and nurses and review standardized counseling for prenatal sites and labor and delivery and IPLARC uptake, to evaluate program success and sustainability.

IMMEDIATE POSTPARTUM LARC IS NOW LIVE!

WHAT
Nexplanon
Mirena / Paraguard IUD

WHEN
Monday
March 4th, 2019

HOW
- Mirena: order through <Admission order set: Insert your process here>
- Nexplanon: order through <Post-partum order set: Insert your process here>

- Once ordered, devices are now available on L&D and the postpartum unit.
- Insertion kits with all needed supplies are available (insert location here).
- Insertion checklist, consent and patient post-procedure information are available in the EHR.
- Dot phrase for documentation, billing codes are also available.
Outpatient Contraception Counseling & Documentation

- Sustainability depends on comprehensive contraceptive counseling with contraception plan documented for all patients regardless of prenatal care site
- IPLARC should be included as an option for all patients
- Contraception counseling / plan documentation should be documented for all patients in both prenatal care and delivery admission records
Important Measure to Drive your QI as prepare to GO LIVE

• Random sample of 10 delivery records
  – # with comprehensive contraceptive counseling including option of IPLARC documented in the prenatal record
  – # with comprehensive contraceptive counseling including option of IPLARC documented in the delivery admission

Work with your outpatient sites to develop a mechanism to document prenatal comprehensive contraceptive counseling for every patient in the prenatal record

Possible approaches:
1. Build contraception counseling / plan documented into EMR for prenatal care and delivery admission
2. Use of dot-phrase for contraceptive counseling documented
3. Make sure providers know data is being tracked for QI and provide feedback to outpatient sites regarding % documentation
Data form for sample of 10 charts per month to track % contraceptive counseling documented prenatal and delivery admission

If your hospital is routinely counseling, offering, and providing immediate postpartum LARCs, either IUD, implants, or both, please review a random sample of 10 charts for this month.

Begin by systematically selecting 10 records.

First, divide the total number of live births occurring at your facility in a given month by 10 and then select every nth chart where n is the result of that division.

Example 1: If your hospital has 102 births in a month, then divide 102 by 10=10.2 and you will select every 10th birth for that month.

Example 2: If your hospital has 28 births in a month, then 28 divided by 10 is 2.8 and you will select every 2nd birth for that month.

Review this random sample of charts and record the number of charts (0-10) with the following information documented:

34. How many charts with contraceptive counseling, including IPLARC, documented/10 during prenatal care?

35. How many charts with contraceptive counseling, including IPLARC, documented/10 during delivery admission?

MAKING SYSTEMS CHANGE LAST: SUSTAINABILITY AND COMPREHENSIVE CONTRACEPTION COUNSELING
Sustainability Matters!

• Look for an IPLARC Sustainability Plan template all teams submit filled in plan by May 2020 (before Face to Face).

• Sustainability plan includes:
  – Focus on improving comprehensive contraception counseling including IPLARC documented rates for affiliated prenatal sites and during delivery admission
  – Women requesting IPLARC receive it during delivery admission and have appropriate follow up
  – Ongoing training for providers and nurses
  – New hire education for providers and nurses
NEXT STEPS
Next Steps

- Review 30-60-90 Day plan for GO LIVE Goal
- Complete REDCap data submission for January (and November and December if you haven’t yet) by the end of the month.
- Continue monthly team meetings and review data reports with your team!
- Contact us if you need help troubleshooting a challenge to achieving your GO LIVE date! Let us know when you achieve your GO LIVE goal!
- Go LIVE isn’t the end. In the second half of 2020 we’ll work on IPLARC sustainability and improving comprehensive contraceptive counseling
