

MNO OB and Neonatal Team Join for Monthly Multidisciplinary Taskforce Meetings – Collaboration is the Key

Admissions of mothers with OUD reviewed:

- Processes which are working
- Areas of concern
- Opportunities for improvement

All NAS cases Reviewed for:

- NICU admission
- Need for pharmacologic treatment
- Number of doses given

“Hard-Wired” Processes

Screening

- NIDA Quick Screen on Admission - in EMR
- Urine Drug Screening Policy
- Urine Drug Screen checklist paper

SSMHealth - St. Louis Region Patient Care Portal

Urine Drug Screen Checklist

Urine Drug Screen Checklist

Urine Drug Screen Checklist

Treatment Policies

- Standardized functional assessment
- Emphasizing non-pharmacologic treatment

Assessment of Baby at Risk for Neonatal Abstinence Syndrome

Flowchart detailing assessment steps and interventions.

Coordinated Discharge

Discharge Begins on Admission

Nurses:

- Review admission packet
- Educate re: NAS symptoms and treatment
- Support non-pharmacologic care
- Feeding plan – fortifying EBM or formula

Pediatricians:

- Ensure follow-up appointment
- Handoff to community pediatrician
- Appointment for neuro follow up clinic

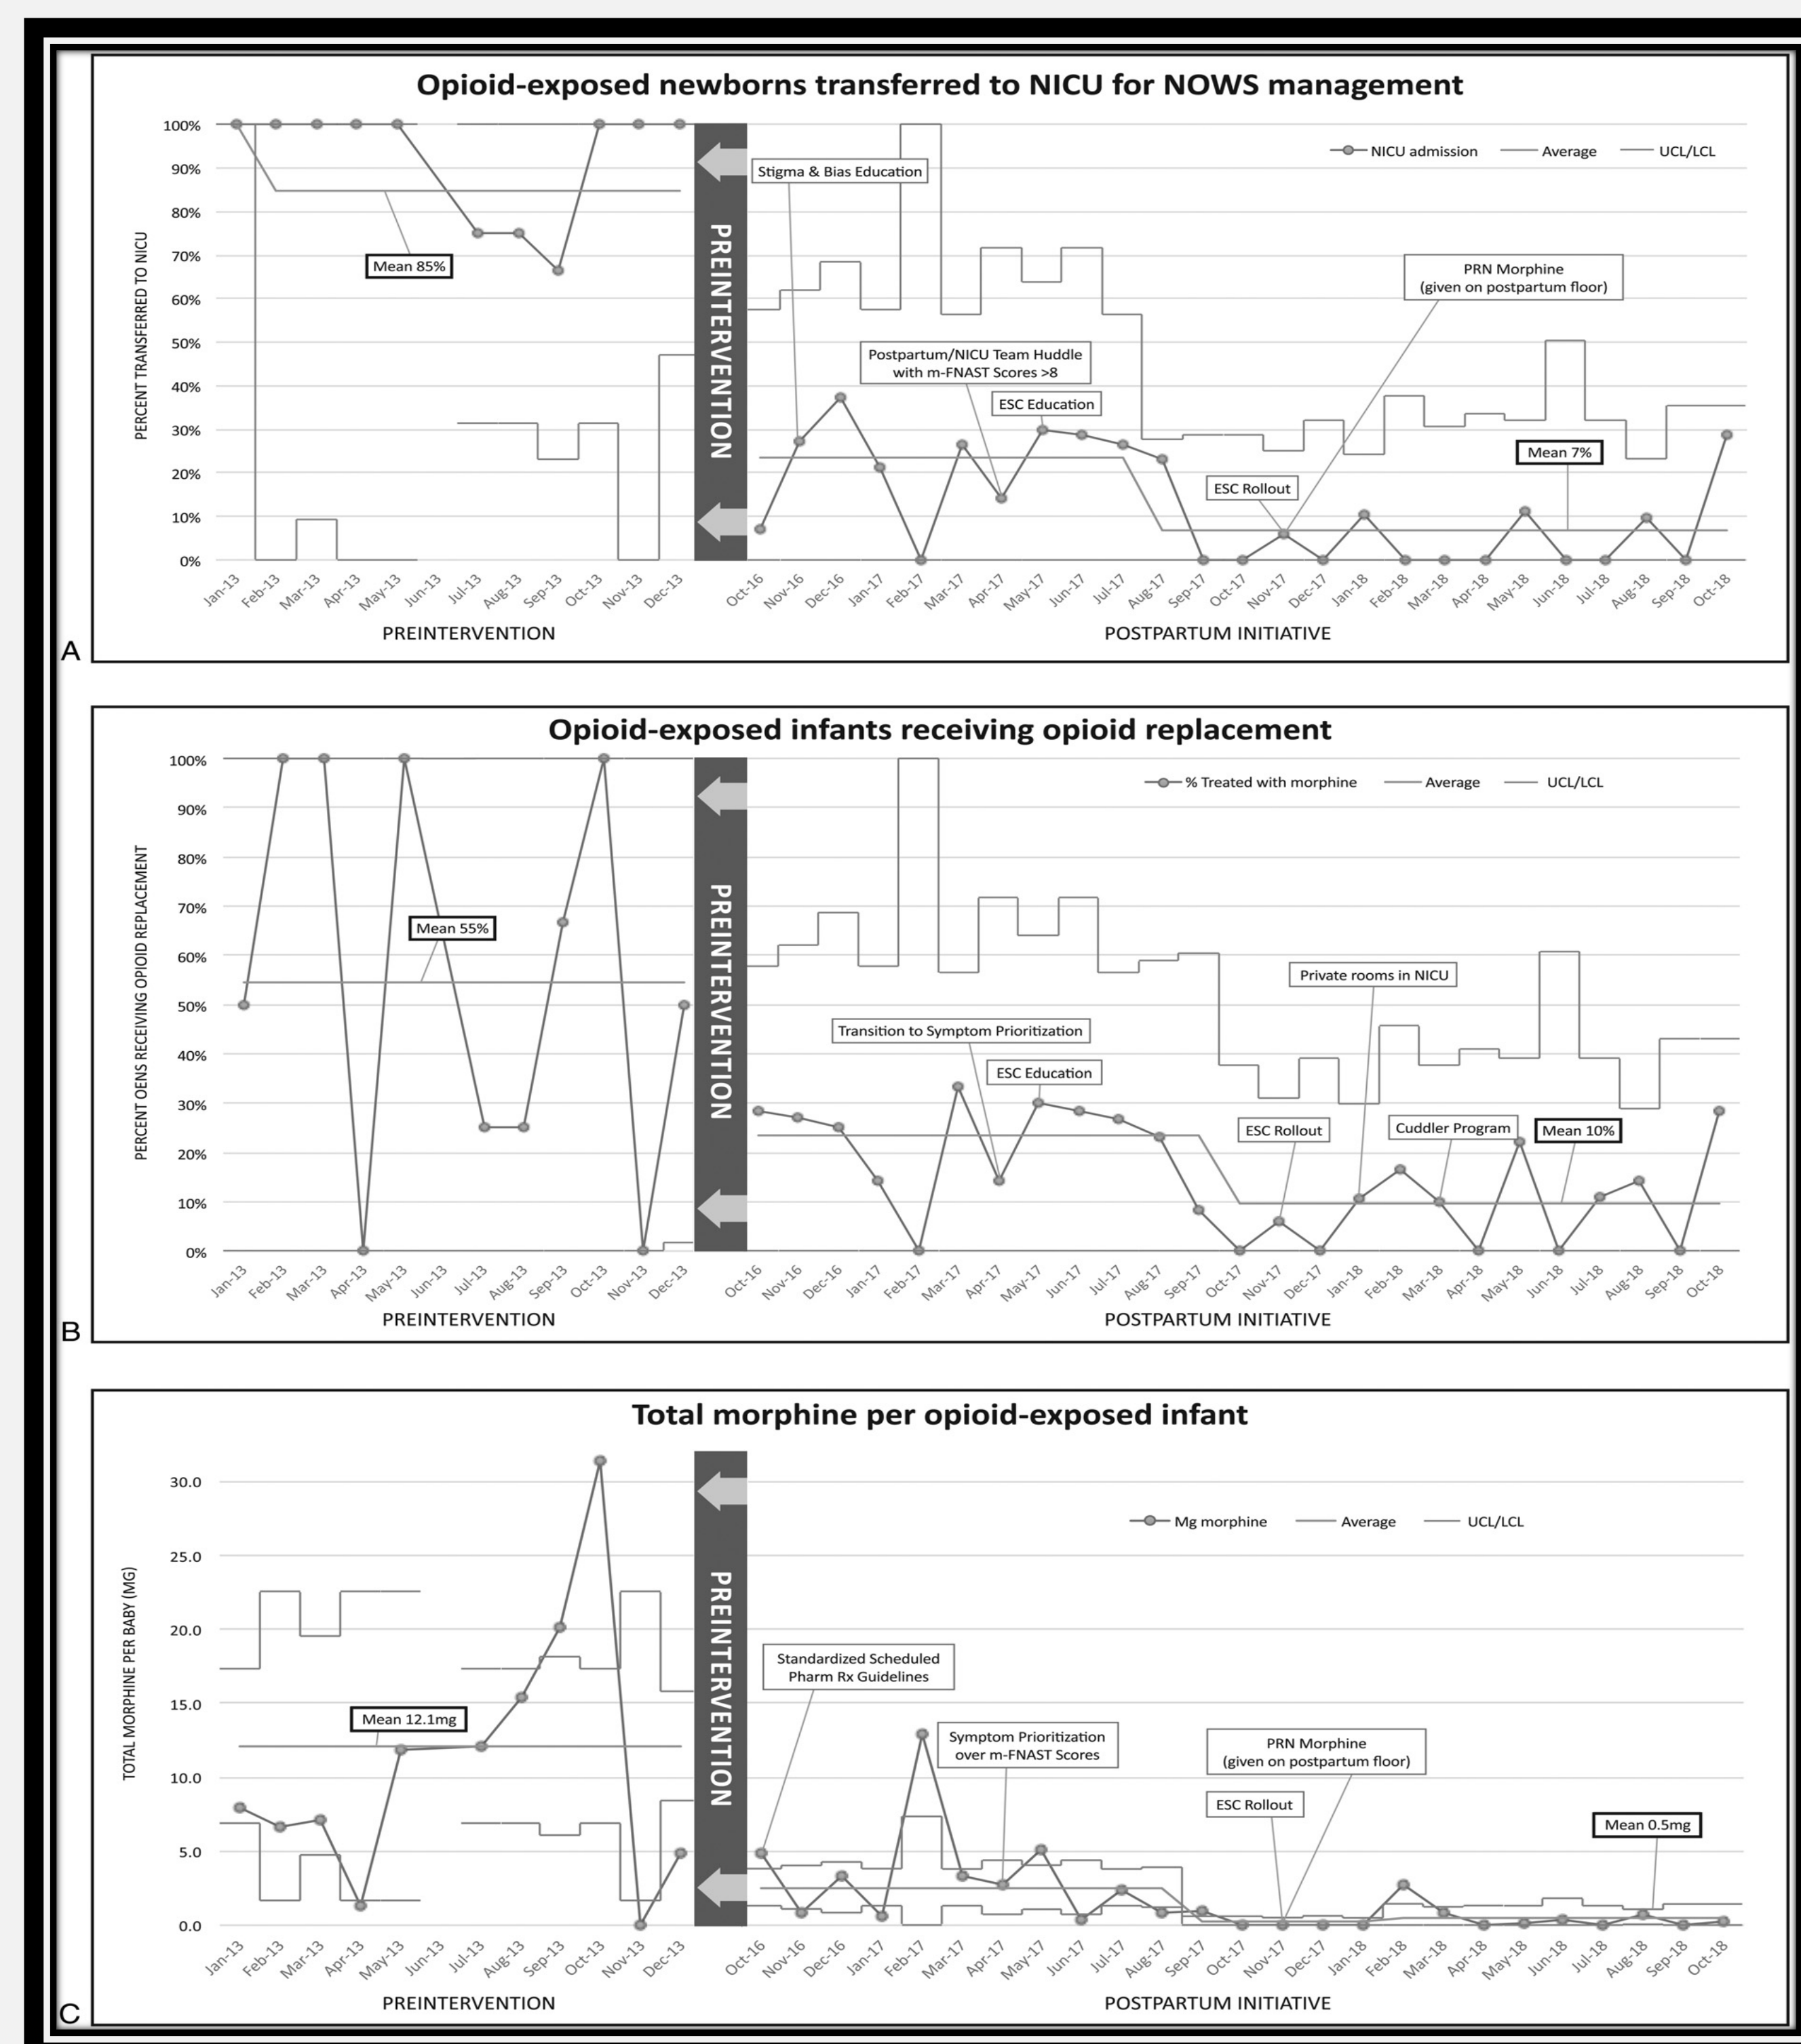

Social Workers:

- Family assessment
- Referral to community resources
- Notification to state agencies

Occupational Therapist:

- Neuro assessment
- Reinforce education on non-pharmacologic measures
