

PMH Initiative 6 Key Systems Changes

Provider Education & Engagement

Educate all providers on screening & treating patients with PMH conditions using a patient centered, trauma-informed care approach.

Optimizing Treatment

Establish processes for assessing & treating PMH conditions in obstetric and other care locations.

Patient and Community Education & Engagement

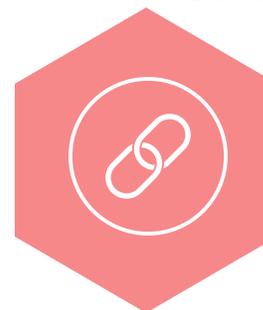

Educate patients on PMH conditions, warning signs and hotline resources. Collaborate with patients & communities and identify community-based resources.

Key Systems Changes

Linkage to Resources

Enhance linkage to mental health services for improved care coordination and innovations to reduce barriers to access.

Screening & Assessment

Enhance screening of PMH conditions in perinatal period.

Optimize SUD Care

Continue optimizing care of people with SUD through assessment & linkage to resources (DOPP, MAR NOW).
